Yes, I can do that. When are you getting in? Should we meet at the airport, your motel, or my office? Depending on how early you are here, we could do some driving on the main roads of the upper Animas (there is still snow on most).

I will be hurrying home after the meeting. You may want to see if anybody else is staying in Silverton for dinner, or at least hang around for a while and come back with somebody else.

My cell phone is [Personal Phone/Ex. 6]

I am in meetings all day today, but could text at that number.

Hey Kay – Are you per chance driving up to Silverton on Thursday for the ARSG meeting? I am flying in to Durango and was wondering if we could car pool? I'll be flying back to Denver on Friday AM. That way I could pick your brain a bit about the site. If it doesn't work, I'll see you at the meeting anyway.

And thanks for the comments on the comm. strat.

What a wealth of information, and a good depiction of excellent science in the powerpoint!

One comment: the slides show Cement Creek treatment starting in 1996. I believe there should also be some mention of American Tunnel treatment from 1978 to 2003. Perhaps that will be in the discussion, but just looking at the slide may leave the wrong impression.

Below are excerpts from the ARSG timeline document, which is how I understand the story.

"Summer, 1996 American Tunnel 1st bulkhead installed. SGC begins treating CC as part of CD.

CC was treated into 2003 except for a short period in 1999. The CC flows treated did vary from all of CC in winter to just a portion in the summers. The flows treated ranged from ~450 gpm to ~1600 gpm. This included both CC and American Tunnel so if American Tunnel was < 90 gpm then CC was the rest treated."

Brent – Here is the comm. strat in preparation for the meeting with the County next week. Let me know if you have any Qs or comments on it. I’ve also included some draft power point slides that Dan has prepared for the meeting with the County on the “state of animas”. He is making some minor revisions to make things a little easier to understand so don’t distribute them too broadly yet. I’ll send you the final version when he is finished but thought I would give you a “peak” at the slides. Dan is planning on just 5 slides so ignore the last 5 as they are his 1st version - he is still revising the 1st 5 slides.

Is that clear as mud?

I was planning on preparing an agenda for our meeting next Monday but haven’t gotten there yet. Do you have any thoughts on issues that BLM wishes to discuss at the meeting – either with the RA or the follow-on meeting with Martin Hestmark and the “bigger” EPA

team. Let me know so as I pull an agenda together I can include.

Thanks.
